CURATED INTERIORS RENOVATION AND DEVELOPMENT

For almost 20 years, we've inspired our clients with ideas they wouldn't have otherwise considered or have been able to achieve themselves. The home featured was purchased by our clients, as a country retreat, an escape from busy London lives and a place to entertain friends. Our design meetings were a fun time for clients, not stressful, safe in the knowledge that we were exploring all options whilst behind the scenes, we were managing every detail on their behalf.

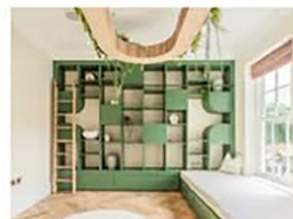

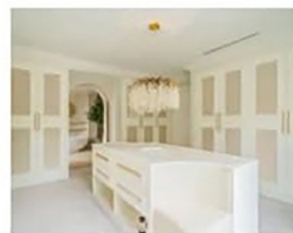

A combination of retro style materials blended seamlessly with original beams and incredible oak boards. Rich green tones were carried through various rooms, all with their own identity yet inextricably linked, a skill taking many years to perfect, often undervalued. As part of our One Stop Shop approach, we guide clients from early conception, through architectural detailing and planning, building work and all interior design aspects to final delivery. Whether a city home, farm house or new build property, our private client team provides a collaborative and meticulously managed process, ensuring exceptional results for our clients, who return to us time and time again.
